

## French language collection

The Doucette French Language collection provides French Immersion teachers with professional and curriculum resource materials in French. Its emphasis is on curriculum documents and K – 12 textbooks but there are also professional materials, including journals, and some children’s fiction and non-fiction. While much smaller than the English collection, the French collection does contain over 3,400 titles.

French language materials are all housed together, in the back corner of the library.

### Searching

It is better to use English in your search, because that is the language used in library subject headings. However a keyword or title search in French will find French terms in titles.

Limit your search to the French collection, by using the Advanced Search screen and from the ‘location’ menu choose *Doucette Library - French language collection* (see illustration below)
